Robet Bagwell

Software Engineer

I am a software engineer looking for my next challenge. I look forward to being a valuable member of a team working on challenging projects. I have a passion to learn and understand new concepts, creating beautiful code, and both collaborating and working solo on projects. I have a good eye for detail when implementing designs. I love the satisfaction of creating projects just like the designer intended.

WORK EXPERIENCE

Life & Science Publishing   April 2020 – Present

Job Title: Software Engineer

Job Highlights: Head developer, charged with creating new features for a current online store, as well as a phone app to ensure the best customer experience ever. I enjoy solving new problems and challenges that arise.

Technologies: PHP, HTML5, CSS3/LESS, JavaScript, MySQL, Magneto.

Alchemy Technologies   December 2019 – March 2020

Job Title: Full Stack Developer

Job Highlights: Created and updated code for a web application to help assist with loan creation and tracing. Working with a team, we maintained reusable code as well as tracked and fixed bugs as they arose. Created endpoints for our API in the back end, as well as created the UI elements and styling for the front end.

Technologies: HTML5/CSS3, JavaScript/ES6, JQuery, NodeJS, MongoDB, and Json.

Vant4ge (Vantage)   February 2019 – November 2019

Job Title: UX/UI Developer

Job Highlights: Created and updated the user interface of the Vant4ge point app to ensure that there was consistency throughout the application.

Technologies: HTML5/CSS3, JavaScript/ES6, JQuery, Angular, and ReactJS, MySQL.

Spotlight Home Tours   May 2018 – February 2019

Job Title: Software Engineer

Job Highlights: Helped maintain the company website, along with working with and creating APIs. Working in a development team we made additions to the site and fixed bugs when they arise. In addition to maintaining the site, I helped in the development of a phone app to help people with social marketing.

Technologies: HTML5/CSS3, JavaScript/ES6, JQuery, PHP, and ReactJS.

Claim The Web   March 2013 – May 2018

Job Title: E-commerce Manager/Web Developer

Job Highlights: Maintained and managed E-commerce sites and web applications. I programmed an AWS (Amazon Web Service) script that saved the company ~$3600/year. Used WordPress to add blogs to the E-commerce site and styled it to mimic the site.

Technologies: HTML5/CSS3, JavaScript/ES6, JQuery, PHP, AWS, MySQL Photoshop.

POSIM LLC   June 2011 – March 2013

Job Title: E-commerce Manager/Web Developer

Job Highlights: Maintained and managed 120 eCommerce sites. Worked with a small team to fix bugs to maintain and create a reusable code library.

Technologies: WordPress, HTML5/CSS3, JavaScript/ES6, JQuery, ASP.net, SQL, Photoshop.

Full-Service Web Design (internship)   April 2011 - June 2011

Job Title: Web Designer

Job Highlights: Designed and maintained websites with the use of HTML and CSS.

Technologies: Photoshop, WordPress, HTML5/CSS3.
